

Three Team Game

Organization: Divide the rink into thirds. Cross ice if you want two games, full ice if you want one. Three equal teams, one in each zone. Team in the neutral zone attacks either end with the puck. You can play no offsides and the defensive team cannot force outside its zone. Try to score. If the attacking team scores, they get the puck and attack the third team at the other end. If the defensive team gets the puck to the neutral zone, they then attack. Encourages one and two touch passing. Works well with 3 teams of three.

Purpose: Fun, all aspects of attack, transition and defensive coordination.

Notes:
